Lewis Says ESP May Be Dropped

By J. C. Casper

It appears that by the fall of 1973 the University may discontinue the Educational Support Program (ESP). For two academic years this program has attempted to give the student who was not academically prepared for college the opportunity to make up deficiencies by taking special classes.

"... could have benefited, but didn't."

ESP students were not necessarily given easier course material, but received more attention from the instructor. This was accomplished by reducing the teacher-student ratio, according to Sharp Lewis, ESP Director. He is recommending that the program be discontinued. The justification given by Lewis for the program's demise was that, "It could have benefited students, but it didn't."

One problem Lewis (the third director in two years) encountered was in the administration of the program which he termed "unwieldy." As director he had only one person under his direction and was forced to rely on the cooperation of the various academic departments for the remedial programs which were taught.

William Gaines, Dean of Academic Affairs, announced that "The future of ESP as a program is under review. We are constantly reviewing programs of service to our student body."

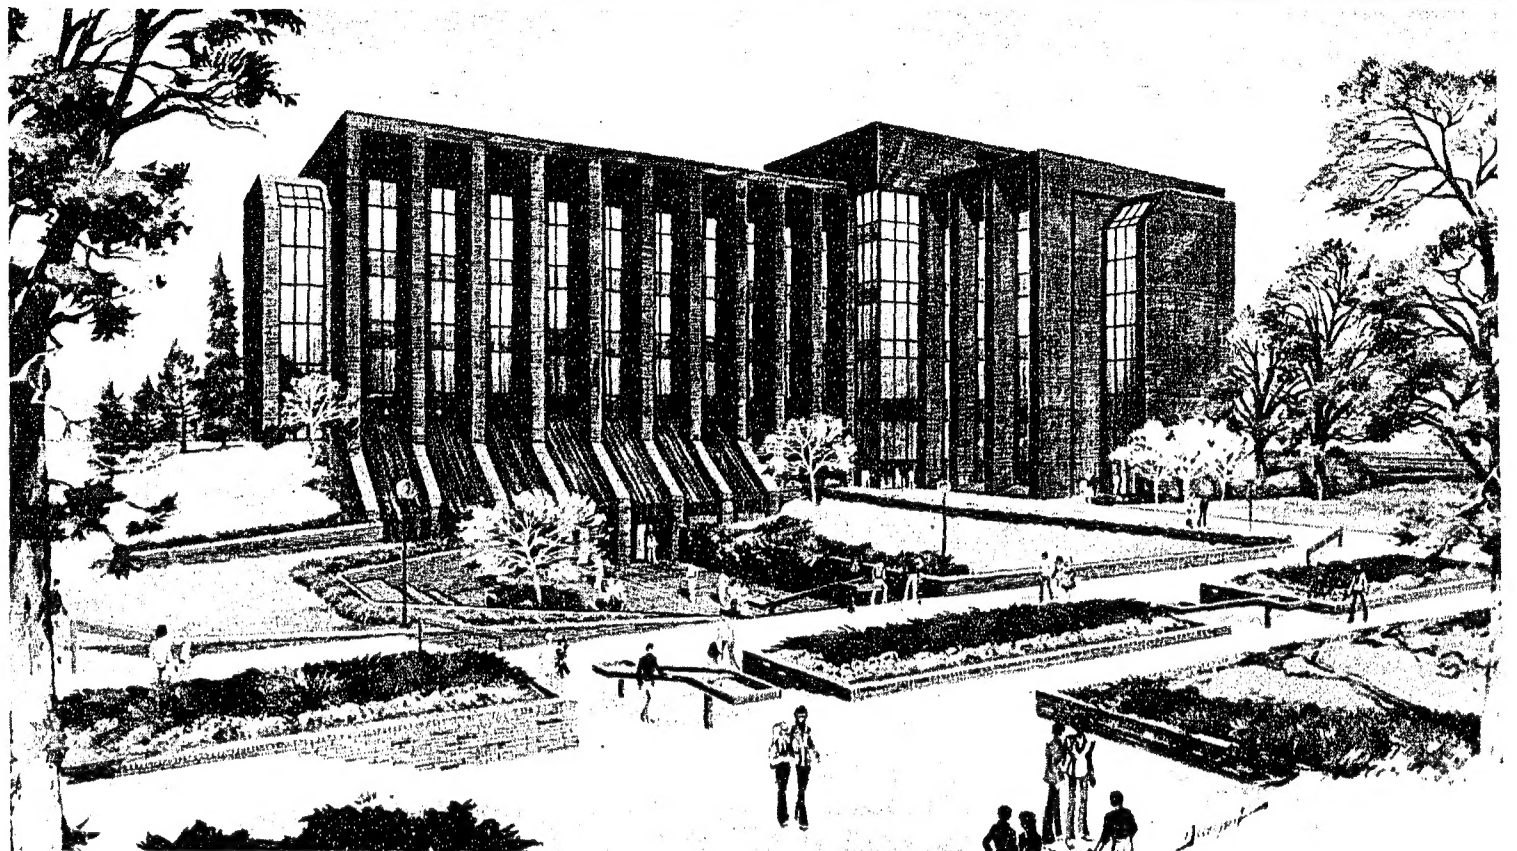

Further proof of the administration's focused attention on the program was given by Charlie Hein, Director of University Relations, when he responded to the question of the program's future, "... (It) has been under discussion and review with a view towards reinforcing and modifying remedial programs."

\$3.7 million Classroom-Office Building ... First of its kind in the Midwest

Roundtable Sessions In UNO Building Plan

Bids will be received next week for the University of Nebraska at Omaha's \$3.7 million Classroom-Office Building to have a lecture hall which will be a forerunner in higher education and the first of its kind in the Midwest.

The 388-seat lecture hall, with "teaching stations" on electrically-powered turntables which can be rotated individually, will be located on the lower floor of the five-story structure to house the College of Business Administration and Departments of English and Political Science.

Outside the lecture hall will be a recessed plaza which may be used as an outdoor classroom or an informal meeting area. This also will be an entrance to the lecture hall where public programs will be scheduled.

Zone One Complete

Kirkham, Michael and Associates are architects for the building which will complete development of Zone One of the Campus Plan outlined in 1971 by Caudill-Rowlett-Scott, architects-planners, of Houston, Texas. The structure has 93,315

square feet and the recessed plaza has 4,932 square feet.

Completion: 1975

The building, designed to be totally accessible and useable by physically handicapped persons, will have an exterior of red brick with glass curtain walls and will be located north of the Administration Building, adjacent to Eppley Library. It is expected that construction will be started in late July and the building completed early in 1975.

Bids for mechanical, electrical and elevator work will be received June 19, at 3:30 p.m., in Room 110, UNO Administration Building. Bids from general contractors will be opened June 22, at 3:30 p.m., also in Room 110.

Dr. Rex Engbretson, assistant to the chancellor for planning, stresses that the unusual features of the specially-designed lecture hall will provide UNO with a usage versatility unique in this area.

Soundproof

The hall floor will have three turntables — two with 66 seats each and one with seating for 112 persons — and an area with 144 immovable seats. A facility with seating for 388 persons can be created by turning all seats to face the front. Or individual "classrooms" may be created by turning the individual turntables to form separate teaching areas or groups of teaching areas. A portion of the exterior of each turntable has a mounted, acoustically treated, wall which makes each "classroom" relatively soundproof.

Other facilities of this type are located in Phoenix, Ariz., and

Toronto, Canada, Dr. Engbretson said.

Inside the building will be classrooms, conference rooms and faculty offices. There will be a vending area on the first floor, student lounges on second, third and fourth floors, and a faculty lounge on the fifth floor. An area for accounting machines will be on the second floor, and a room containing computer terminals in planned on the fourth floor.

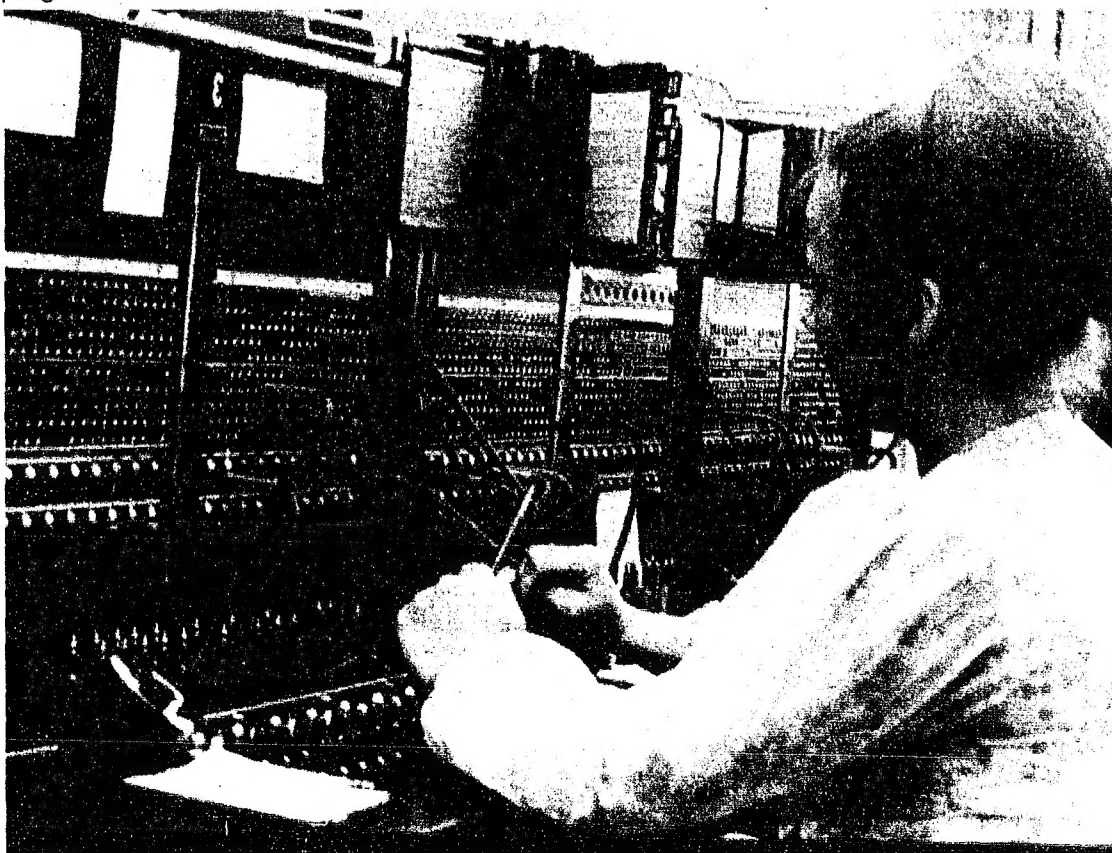

The building and recessed plaza, to have 4,932 square feet, will be an integral part of a redesigned mall area to have four large planting areas and 38 trees, 400 shrubs and about 2,500 small plants.

Elms will Go

Some of the 35 American elm trees now in that area will be cut down. Last September, a six-member technical resource committee evaluated the trees and found that four were dead and only one of the 35 free from what the committee called "obvious problems."

The building will be located on Parking Lot L which now provides space for 65 cars.

Completion of the building will leave UNO with two remaining zones, or areas, for general education, according to the UNO Campus Plan. One is west of the Engineering Building and is reserved for a new building to house physics, mathematics and the natural sciences. The other is south of the Fieldhouse, to be used for physical education and recreation. The campus plan outlines 14 zones — five for academic use, one each for the library, administration and physical education, two are permanent open space and four are for parking.

Goodbye to Dammit

Schilz In First UNO-Kabul Trade

Dr. Gordon Schilz, professor and chairman of the Department of Geography and Geology at the University of Nebraska at Omaha, has been awarded a Fulbright-Hays Lectureship.

Gordon Schilz

As one of about 100 U.S. post-doctoral scholars selected annually for work abroad, Dr. Schilz will go to Kabul University in Afghanistan where he will be a lecturer in the field of geography and a member of the faculty of letters and humanities, Department of Geography. He and Mrs. Schilz will leave July 15 and spend about a year in Afghanistan.

William Gaines, UNO Dean of Academic Affairs, announced that a Kabul University faculty member and a graduate student there each has received a Fulbright-Hays award to come to UNO for the next academic year.

Prof. Ghulam Panjshiree, an associate professor of Arabic and literature at Kabul, will have a Fulbright-Hays Lectureship at UNO next year. He will teach in academic programs involving language development and literature, and will work closely with Christian L. Jung, UNO assistant professor of geography-geology and director of the Afghanistan Studies and Research Program at UNO.

Abdul Rahman Sadid, a student at Kabul, will do graduate

work in geography at UNO under a Fulbright-Hays Award.

Dr. Schilz and two Afghan scholars-researchers are involved in the only Afghanistan Studies and Research Program in the world. It is anticipated that this program, established at UNO last winter as an interdisciplinary program within the College of Arts and Sciences, eventually will include seminars and workshops and summer institutes at UNO, along with exchange programs.

In addition, it is expected that an international center of library materials, supplied by local and regional foundations, federal funds and private donors, will be established at UNO.

The program carries forth the University's thrust in international education. UNO already sponsors an European program in urban/ethnic studies at U.S. Air Force bases in Torrejon, Spain, and Wiesbaden and Rhein Main, Germany, and has a new interdisciplinary degree program in Latin American Studies.

For Dr. Schilz, the experience in Afghanistan will culminate a distinguished career which has included a Fulbright lectureship at the University of Mandalay, Burma, in 1950-51, and about five years as director of the Imperial Ethiopian Mapping and Geography Institute in Ethiopia.

He was on the faculty at Southeastern State College, Durant, Okla., from 1948 to 1958, and at Iowa Wesleyan College, Mount Pleasant, Iowa, from 1943 to 1948. He has the bachelor of arts degree from Albion College, Albion, Mich.; the master of arts degree from Columbia University, New York City; and the doctor of philosophy degree from Clark University, Worcester, Mass.

Committee Narrows to Three

By Dave Priester

The structure of the University administration will be revised in the near future with the addition of a new vice-chancellorship. Dr. Ronald Beer, Vice-Chancellor for Educational and Student Services, and Mr. Harold Keefover, Vice-Chancellor for Business and Finance, will be joined in the upper ranks of University governance by a Vice-Chancellor for Academic Affairs.

Although the new position has not yet been filled, a search committee has completed its task of narrowing the field of applicants. Chaired by Dr. Ralph Wardle of the English department, The Search Committee for Vice-Chancellor for Academic Affairs was composed of faculty, administrators, and students.

The committee was charged by Chancellor Roskens on April 13 with the responsibility of searching, screening, and returning to him a list of three to five individuals who, in the estimation of the committee, were qualified to hold the position. The Chancellor also pointed out that he hoped the position could be filled as soon as possible with the person selected taking office on September 1, 1973.

The cover letter utilized in the search indicated the committee was seeking an individual with significant experience in teaching, research, and administration. To advertise the opening the committee utilized such communicative media and associations as the *UNO Weekly Communicator*, *The Chronicle of Higher Educa-*

tion, the American Council on Education, The American Association of University Professors, and the chief executives at major universities. Over one-hundred individuals responded representing colleges throughout the country. The committee also received applications from within the University.

The committee recently completed its assignment and a list has been submitted to the Chancellor. If he accepts the list it is expected that he will invite the individuals on campus to be interviewed by various segments of the University. The response of the University community to these individuals will be used by the Chancellor to help determine his final decision.

24 Hour Service in Future

July 2 Marks Switchboard Change

By Kathy Etter

Old Dammit, as it's known in switchboard circles, won't be around after July 2 to connect the University of Nebraska at Omaha with the rest of the city.

After 35 years of handling all calls into and out of the university, Old Dammit, UNO's switchboard, will be replaced by a more modern system called Centrex, a replacement that should "improve service tremendously," said Don Peterson, head of campus construction.

The problem with the old switchboard system, Peterson said, was the lack of trunk lines into the university and of answering services — a problem that simply got worse as the number of calls increased. In the past few years the switchboard has had to handle up to 4,700 calls a day.

Under the old system all calls to campus offices had to go through the switchboard with its one number. With only so many lines available, persons calling into the university were often greeted with busy signals and delays.

The same was true of outgoing calls also, Peterson said. Before the changeover, a person dialed nine to get out and usually met with a busy signal, all outgoing lines being busy. After July 2 a person will be able to call directly out, he said.

Under the new system, each campus office will have its own number which can be dialed direct instead of through the switchboard.

For example, with the old system a person calling the Gateway office would have to dial the main campus number, 553-4700, and then ask for extension 470. With the new Centrex system, however, a person will simply dial the Gateway office's individual number, 554-2470, direct. A person on campus calling out

will also dial direct instead of going through the switchboard.

Northwestern Bell's latest telephone directory lists both the present university numbers and the new numbers which will go into effect after the changeover.

The changeover will provide, in effect, a "24 hour service," Peterson said. "If the person is on campus he can be reached as long as he's there" since the call won't depend upon the switchboard but will be made directly to the person's office.

"There will still be operators as such, but merely for information," Peterson said. A caller, unsure of the correct number, will dial into the switchboard itself, get the desired number from the opera-

tor, and then call back using the direct number.

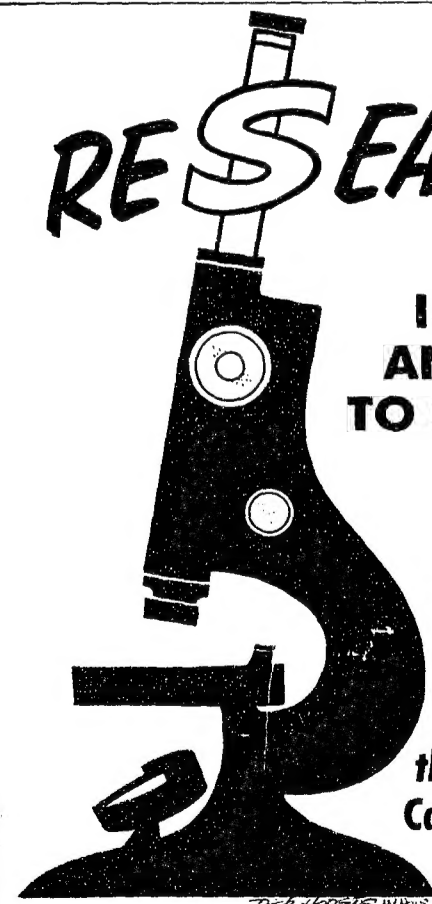

The move to a new switchboard system "has been in the plans for several years," Peterson said, but UNO's just now "getting enough money to make the change."

The first year's cost, including the changeover to new equipment and the installation of phone lines (most already installed) is approximately \$40,000, he said. The budget for next year's phone bill has also been increased from \$80,000 to \$120,000 by the Board of Regents.

And what of Old Dammit? Although its operators will remain, Old Dammit itself won't. Property of the telephone company, Peterson said, its future is up to them.

DEAR MAMA: I am a 340-lb. weakling, also known to friends and family as a milquetoast. The other day, through a cruel accident of fate, sand was kicked in my face. This was known as the San Francisco Earthquake. If only the San Andreas Fault hadn't split. I am now STUCK somewhere between Vallejo and San Francisco. Please answer right away, I hear classes began last week.

EIGHTH WONDER OF THE WORLD

DEAR EIGHTH: Shed 50 pounds of ugly fat. Cut your tongue out.

DEAR MAMA: I have been attending college for eight years and will soon receive my degree. This venture has been financed by my mother, who is a dishwasher at the Delmar Cafe. I find now that my goal in life is to be a bum and I do not want to work. How do I explain this to someone who broke her back putting me through college?

DEAR PUZZLED: Many people in all walks of life are professional ne'r do wells. I suggest that you take the Civil

Survey Shows 75 Per Cent Are Employed

Results of the study on student employment were recently released by the College of Continuing Studies and Institutional Research.

A total of 11,859 (or 84.8 per cent of students enrolled in on-campus programs last spring) responded to the survey.

The survey revealed that 75.1 per cent of the respondents are employed. Of this number, 3,177, or 42 per cent, hold full-time jobs. The percentage figure represents an increase over the number last year, when the survey showed that 37.6 per cent of UNO students had full-time jobs.

The survey showed that there are 337 major employers with three or more student employees. Four employers — City of Omaha, Omaha Public Schools, U.S. Government and the University of Nebraska System — hire 200 or more students. Five employers — Brandeis, Douglas County, Hinky Dinky, Northwestern Bell and Western Electric — each employ more than 100 students.

Service Examination, as the government employs many professional, licensed ne'r do wells. Who knows, with your qualifications you could go straight to the top.

DEAR MAMA: I am a particularly charming older man. I hold an extremely responsible position at this University. My problem is that because of my amicable personality, certain unsavory characters play me for the fool. It is costing me big bucks and besmirching my academic character as well. I know you can't teach an old dog new tricks, but is there any hope for me?

A REAL SPORT IN THE ADMINISTRATION BUILDING

DEAR SPORT: Sounds to me you might be a bit of a sucker. It is true that you can't teach an old dog new tricks, but maybe you can teach an old dog cheaper tricks.

No Permit?—

—Cancel It

If you received a ticket during the first week of classes, June 11-15, you can have it cancelled upon purchase of a valid parking permit.

Those who have not yet purchased parking permits may do so at the Campus Security Office from 7:30 a.m.-7 p.m., Monday through Friday. Auto parking permits cost \$5 for the period through August 26, and motorcycle parking permits cost \$3 each for the same period.

I.D. Cards for those who did not pre-register are available at the Information Desk, first floor Milo Bail Student Center.

First of a three part series UNO SUMMER THEATRE

The UNO Summer Theatre, now in its fourth season, will provide the theatre buff an interesting and varied fare within the next month. Two scripted plays by prominent authors and one original work are in the offing. The company is composed for the most part of drama students who, along with the acceptance of a moderate stipend, are required to participate in all three of the productions in either a technical or performing capacity.

THE EFFECT OF GAMMA RAYS

ON MAN-IN-THE-MOON

MARIGOLDS

The first of the plays will be the award winning work by Paul Zindel. Originally an off Broadway success, Gamma Rays won the 69/70 NY Drama Critic's Award, the Pulitzer Prize, shared the OBIE award and was adjudged the best American Play of the season. *Time* magazine called it "a Psychologically perceptive ambience." The play involves an all female cast and deals with, "Frowzy, acid-

tongued Beatrice Hunsdorf who, supporting herself and her two daughters by taking in a decrepit boarder, wreaks a petty vengeance on everybody about her. One daughter, Ruth, is a pretty but highly strung girl subject to convulsions; while the younger daughter, Matilda, plain and almost pathologically shy, has an intuitive gift for science. Encouraged by her teacher, "Tillie" undertakes a gamma ray experiment with marigolds which wins a prize at her high school and also brings on the shattering climax of the play." Thus does the story line read in the Dramatists Play Service Catalogue.

Zindel, formerly playwright in residence at Nina Vance's Valley Theatre in Houston, Texas drew the following comment from Walter Kerr of the N.Y. Times: "With it (the play) Mr. Zindel becomes one of our most promising writers." Jerry Tallmer of the N.Y. Post describes the play with the single word "POWER" while Lee Silver, N.Y. Daily News cites

the play as a "great human drama."

This first of the three Summer Rep Plays will be under the direction of Dr. Robert Moore and employs some of the finer talent available. JEAN ERDINGERGER assumes the role of Beatrice; MICHELE ROTHKOP will play Tillie; MARIA COLLINS will portray Ruth; MARIANNE YOUNG as Nanny and JANICE VICKERY completes the cast as Jean Guinan. Set design by Robert Welk and technical direction by Ralph Murphy will lend visual excellence to the production.

Performance dates are set for July 5, 7 and 14 in the University Theatre. A second play, Fortune in Men's Eyes by John Herbert will also be performed in the University Theatre while the third production, The Men's Room — an original play written by the members of the cast, will be performed in the Studio Theatre. Season tickets for the three plays may be purchased in advance by contacting Ext. 422.

KVNO Concert Classics

FRIDAY, June 15

1. Berlioz — Symphonie Funebre et Triumphale, Op. 15.
2. Mendelssohn — Sextet in D Major, Op. 110.

Lights and Turf Ready by October

UNO officials hope to dedicate a new artificial turf and lights at the October 13th homecoming game with Northern Colorado. It is hopeful construction will begin within the next few weeks.

The last legislative hurdle was recently cleared on the athletic improvement bill. Now all that remains is for bids to be taken on the work. Weather will of course be a deciding factor in completing the project prior to the homecoming game.

At present it is undecided as to the type of turf (Astro or Tartan) that is to be installed. Athletic Director Clyde Biggers mentioned that both are good surfaces and improvements have been made in both the past few years. Price will also play a role in the decision of the type of turf to be installed.

UNO's stadium presently has a seating capacity of approximately 5,000. Biggers anticipates a need for 10,000 seats and mentioned that bleacher rental is a possibility.

Once all the work is completed it is anticipated that the new facilities will be made available to Omaha high schools.

UNO's first two football games; Jackson (Miss) State on Sept. 8 and Angelo (Texas) State on Sept. 15, are scheduled to be played in Rosenblatt Stadium. The next three games will be on the road; at Morningside Sept. 22, at Washburn Sept. 29, and at Eastern New Mexico Oct. 6. Homecoming is scheduled for Oct. 13.

It is anticipated that there will be some inconvenience during the early football practice sessions but the artificial turf is definite proof the university is moving forward. Coach Al Caniglia, preparing for his 14th season as head football coach, indicated that the new turf and lighting will play a helpful role in the recruiting of athletics for all sports.

UNO FINISHES LAST

Last GPAC Event For UNO

by Kevin Carolan

The University of Nebraska Omaha bowed out of the Great Plains Athletic Conference on a sour note last month as the Mavericks Golf team finished last in the seven team field at Pueblo, Colorado.

Southern Colorado edged Fort Hays State, 605-608, for first place in the tournament. The Mavericks finished last with a 653. The highest Maverick to finish in the tournament was Ron Filipowicz who shot a 157, good for 16th place.

With the spring collegiate sports program completed, the UNO Mavericks have finished their commitment to the GPAC. Effective this fall the Mavericks will no longer belong to the GPAC but will continue to schedule schools within that conference in several sports.

Cards Draft Gary Walker

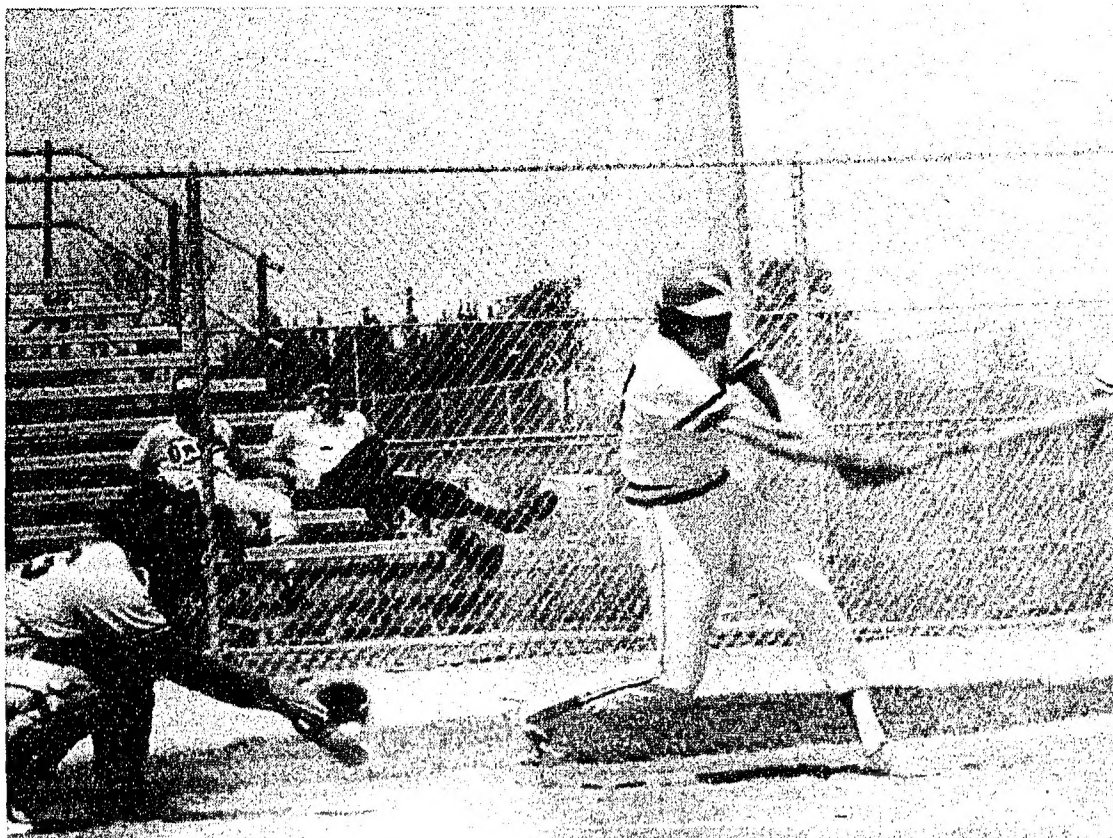

Gary Walker, UNO's pitching ace during the 1973 baseball season, was drafted by the St. Louis Cardinals in the recently concluded major league player draft. St. Louis drafted the right-hander from Lincoln for their St. Petersburg, Florida farm club. Another UNO major league prospect is Maverick catcher, Jack Medick. He is being considered by the Boston Red Sox. Other area baseballers under consideration for major league contracts are Wayne State's John Shape, New York Yankees; Dana's Steve Weitock, Houston Astro's and Jim Lemon Creighton outfielder, Kansas City.

UNO Duo Wins

Dwayne and Sue Disney recently took top honors in the Intercollegiate Trap and Skeet Tournament held at Linn Creek, Mo.

Dwayne shot a 194 to take the men's division while his wife Sue, shot a 172 to take the high gun honors in the women's division.

Jim Columbo, a former member of the U.S. Olympic trap team in 1968, took top honors in the international targets with a 98 x 100 score.

UNO's Don Claussen swings and misses during the UNO-Dana game of the District 11 NAIA Baseball Tournament. The ball is already in the glove of Dana Catcher Mike Giovanni. Dana defeated the Mavericks 10-5.

UNO Ousted by Dana Wayne is NAIA Titlist

Wayne State captured the NAIA District 11 Baseball Tournament held recently at Fricke Field in Papillion. Dana finished in second place in the double elimination tournament followed by UNO and Peru State.

On opening day of the tournament, Dana upset the second seeded Mavericks 10-5; before Wayne State battered Peru State 7-1. In the evening session, UNO eliminated Peru State 11-0 behind the one hit pitching of Dan Langer and Rich Bernstein. Langer struck out 10 and got offensive help from Dave Ksiazek's two singles and triple and Gary Haney's home run.

In the first game, Dana's Steve Weitock got four hits in

five trips to the plate and four RBI's off of UNO pitcher Rick Vuagniaux.

Ron Nelson of Wayne State limited Peru State to five hits enroute to a 7-1 decision over the Bobcats in the second game.

Wayne St. then defeated the Dana Vikings 9-3, completing the first day of action. Wayne State capitalized on walks and Dana errors, enroute to the victory.

The second day of the tournament pitted UNO against Dana in a rematch with the winner meeting Wayne State in the nitecap. In the 5:30 game the Dana Vikings continued it's jinx over the UNO Mavericks by defeating the UNO nine, 9-7. UNO appeared to have the

game wrapped up as they were sporting a four run lead going into the eighth inning, however, a six run barrage against Warren Poldberg and Neil Barna turned the tide for the Vikings and they came away with the win.

In the nitecap, the Wayne State Wildcats put it all together in beating Dana for the district championship, 13-7.

UNO finished the season with a 19-18 record. Senior Jack Medick led the Mavericks in several categories, among them, batting (.353); runs scored (25); hits (47); total bases (71); home runs (6); and stolen bases (10). Dave Ksiazek led in doubles (6), while Rich Bernstein had the most triples (4).

Gonzales Nominated For '73 W-H Award

Six college athletes were recently nominated for the World Herald's State College Athlete of the Year Award, with Nebraska Wesleyan's Kurt Nielsen the eventual winner.

This spring the 20 year old Nebraska Wesleyan Junior recorded one of the best performances in state track history when he high jumped 7'2 3/4" in the Nebraska Intercollegiate Athletic Conference meet in Lincoln. This leap was listed as the fourth best in the country this year.

Others nominated for the award included UNO's Phil Gonzales, NAIA wrestling champion

at 126 pounds.

Fred Carnahan, Platte, National junior college champion in cross country, indoor two-mile and outdoor three-mile.

Ken Monroe, Wayne State, last year's winner. NAIA wrestling champion at 167 pounds and all star defensive end in football.

Greg Kamp, Wayne State, pitching and batting leader for the NAIA District 11 baseball champions.

Tom Kropp, Kearney State, football and basketball.
